

Product Data Sheet

High range pre-stained protein markers

Cat# EW-HMWM-11- High range multi-color protein markers (6.5-205 kDa) for Western

Size: 250 ul

Form: Liquid

Storage: Store at -70oC

Description

Multicolored protein markers consists of dye-labeled purified proteins in the range of 6.5-205 kda. The proteins are labeled with multi-color dyes to clearly distinguish them during electrophoresis and after their transfer on blotting membrane. These markers proteins should be used as regular samples for SDS-PAGE (denaturing) and Western. Load 5-10 ul/lane for std mini gels. Loading volume can be adjusted if necessary. The markers are ready for use after heating. No need to add sample buffer.

Cat # EW-HMWM-11 contains the following proteins:

Proteins	Mol Wt (kDa)	Dye Color	
-Rabbit Muscle myosin	-205	-blue	 -205
-beta-galactosidase	-116	-turquoise	
-Bovine Serum Albumin	-66	-pink	 -116
-Chicken egg ovalbumin	-45	-yellow	 -66
-Bovine carbonic anhydrase	--29	--orange	 -45
-Soybean trypsin inhibitor	-20	-green	
-Bovine lactalbumin	-14	-purple	 -29
			 -20
-Bovine Aprotinin	-6.5	-blue	 -14
			 -6.5

Form and Storage

Store at -70oC in suitable aliquots. Stability 6-12 months.

This product is for in vitro research use only.
